blackOTUS
BY BLACKEYES®

Roaming anti-intrusion device integrates with lockOFF and pushPANIC devices

Used by the French specialised Police Nationale departments

STRENGTHS

> **Quickly removes doubts** to intervene as soon as possible (security forces, fire brigade, healthcare staff, family, etc.)

> Notification received in **0.15 second**, photograph received in **under 9 seconds**

> Up to **200 people**, listed in advance, can receive a notification on their smartphone for a Control alert using a free iOS and Android app

> **Respect for privacy** using protective cover

BLACKOTUS IN DETAIL

PHOTO DETECTOR

The photo detector removes doubts quickly, in under 9 seconds; photos can be sent to 200 contacts (security forces, colleagues, family & friends, etc.).

For a terrorist attack or fire, the security forces can obtain the necessary information essential to implementing an intervention and rescue strategy.

The integrated detector can take from 1 to 5 photos with resolution of 320x240 pixels and up to 3 photos with resolution of 640x480 pixels.

Possible to place up to 200 wireless modules with 4 years' battery life.

The series of photos is displayed in the app as an animation so that the user can evaluate the event as it unfolds, bit by bit.

FEATURES

Installed quickly and easily: magnetic surface / tripod / wall bracket.

Battery life up to 4 years.

Integrated camera, actuated on removal of cover.

Three photo resolutions:

160x120 px – 320x240 px – 640x480 px.

CENTRAL UNIT

INTERROGATE DEVICES

The system checks the operating status of devices at least once every 2 seconds.

BACKUP BATTERY

In the event of a power outage or electrical sabotage, the system can operate completely independently for up to 96 hours.

DEVICE AUTHENTICATION

The exclusive identifier makes it virtually impossible to steal the identity of devices.

MULTI-FREQUENCY

The system switches frequencies to avoid jamming and interference.

ENCRYPTION

Encryption protects data from interception or falsification. Detection of attempts at radio jamming and interference.

4 COMMUNICATION CHANNELS

To maintain the connection, notifications are sent using all the following:

> Ethernet   > 3G
> Wi-fi   > 4G
> Radio
